Credit Requirements/Exceptionally Gifted

The Montville Board of Education recognizes that exceptionally gifted and talented students are rare. Accordingly, the school system, as well as individual schools and school personnel, must be flexible enough to seek out the most appropriate and effective type of service or program for nurturing the exceptional talent or gift.

For its parts, the Montville Board of Education must be flexible enough to empower the appropriate school officials to design programs for individual students who fall into this rare category that, while conforming to overall general requirements, may be accelerated and may make broad use of creative alternatives to traditional forms, sequences, and schedules of instruction.

The Board of Education directs the administration to devise procedures and guidelines to carry out this policy, and to report, as necessary on those rare occasions, on the implementation of those procedures and guidelines.

Policy Adopted: 7/15/97
