

April 25, 2022

Dear MPS Families and Staff Members,

I hope you all had a wonderful April vacation!

While our district has not had many new COVID-19 cases reported in the past several days, rates in the state have been increasing recently. Attached to this letter are important recommendations from DPH to reduce potential COVID-19 risks in schools.

[DPH Letter, 4-25-22](#)

We do have test kits available for student and staff use which you can request from your school nurse. Our case rates continue to be posted on the district website and reported to the CT Department of Public Health.

Our nurses can help you to make decisions about isolation and quarantine if you have questions.

Best regards,

Laurie Pallin

Superintendent, Montville Public Schools
